

Hooking Up Light Fixture

Hooking Up Light Fixture - Often, homeowners purchase a new interior or exterior light fixture, then pay a handyman or electrician to hook it up because the wires are different colors. Most light fixtures have two ...Hooking up a new light fixture in an old house. Light fixture has two black wires and a ground. Box in the ceiling has 3 wires that look the same. Two wires are together and one wire is by itself. I have hooked the two black wires both ways and it lights each time. And when he hooked up his new light fixture, he did what I would expect the majority of homeowners to do—he connected the white wire on the fixture to the white wires in the box, and the black wire on the fixture to the black wires in the box. And then his light switch wouldn't work—the light stayed on all the time.
